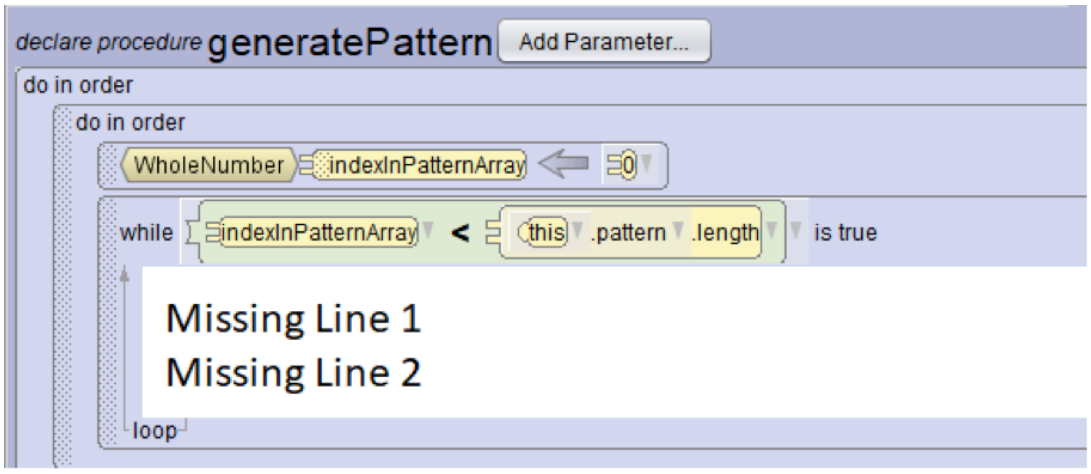
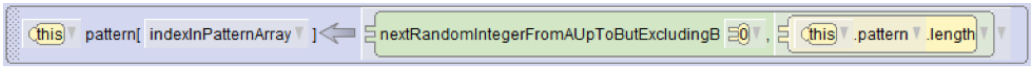
1. Consider the Scene procedure named generatePattern. This procedure has no parameters. This procedure assumes that pattern is a Scene property that is an array of wholeNumbers, and animals is a Scene property that is an array of SJointedModels. The procedure generatePattern generates a random pattern of the animals, by generating a random pattern of the possible indices of the animal array. If the animal array has four animals in it, in positions from 0 to 3, then for each position in the pattern array, generate a random number from 0 to 3.

1 / 1 point

The procedure generatePattern has been written but is missing two lines of code in the while loop.



Choose the two statements that show the code that completes the procedure correctly.


Which statement goes in **Missing Line 1**?
